Summary

Enterprise IT operations leader with 25+ years of experience designing, modernizing, and supporting production technology environments across infrastructure, cloud services, networking, cybersecurity, and end-user computing. Proven success leading enterprise modernization initiatives, data center migrations, disaster recovery, Microsoft 365 deployments, and business automation. Creator of FocalDesk, an open-source Linux desktop environment written in Rust, demonstrating modern software architecture, systems programming, AI integration, and secure systems engineering.

Core Competencies

IT Operations Leadership • Infrastructure Management • Microsoft 365 • Microsoft Entra ID • Windows Server • Linux Administration • VMware Virtualization • Enterprise Networking • Disaster Recovery • Business Continuity • Cybersecurity • Vendor Management • Project Leadership • Process Automation • Cloud Infrastructure • Technical Support • SaaS support • Technical Support

Experience

United Insurance Agencies / Acrisure — Systems Administrator (1998–2023)

- Sole infrastructure engineer responsible for the organization's on-premises IT environment, including servers, virtualization, networking, storage, security, PKI, Microsoft 365, custom software development, and data center operations.
- Managed enterprise PKI using Microsoft AD CS, including internal certificate issuance, endpoint certificate deployment, code signing, public certificate integration, and SSL/TLS inspection controls.
- Led enterprise infrastructure modernization initiatives supporting business growth and operational reliability.
- Planned and executed multiple data center migration and virtualization projects with minimal downtime.
- Managed enterprise networking including Cisco, HP, Dell, Meraki, VPNs, VLANs, DNS, DHCP, and storage infrastructure.

- Developed disaster recovery procedures and restored critical systems during major SAN hardware failures.
- Evaluated vendors and technology solutions to improve reliability while controlling operational costs.
- Evaluated enterprise monitoring platforms, including SolarWinds, and selected OpenNMS based on technical capabilities, scalability, and cost-effectiveness. Designed and implemented infrastructure monitoring for servers, networking equipment, VMware, environmental systems, VoIP, and custom applications using SNMP and custom MIBs.
- Automated business processes that significantly reduced manual effort and improved operational efficiency.
- Evaluated technology solutions, controlled infrastructure costs, and provided input into IT purchasing and budget planning.
- Partnered with business stakeholders, vendors, and technical teams to deliver enterprise technology initiatives.
- Administered Active Directory users, groups, Group Policy, DNS, DHCP, and Windows Server infrastructure.
- Deployed, repaired, upgraded, and retired desktops, laptops, printers, and peripheral equipment across the enterprise.
- Managed enterprise patching and update deployment using Windows Server Update Services (WSUS).
- Led technical support for the migration of Applied AMS360 from an on-premises deployment to its cloud-hosted SaaS platform, coordinating vendor activities, user support, troubleshooting, and rollout.

Acrisure — Service Desk Specialist (2023-2024)

- Provided technical support and incident resolution using ServiceNow while **documenting troubleshooting steps, resolutions, and customer interactions.**
- Authored clear support communications and translated complex Microsoft 365 and identity management issues into language understandable by non-technical users.
- Created accurate case notes and knowledge-sharing documentation to improve issue resolution consistency.
- Administered Microsoft 365 user accounts, licensing, password resets, Microsoft Entra ID (Azure AD), and provided hands-on support for Microsoft Intune device enrollment, policy troubleshooting, and endpoint management.
- Resolved authentication, account access, and workstation issues while supporting remote and on-site users.

Microsoft 365 Tenant Administration (steveweiler.dev)

- Administer Microsoft 365 Business including Exchange Online, Microsoft Teams, SharePoint Online, Microsoft Entra ID, DNS, MFA, licensing, and security policies.
- Configure authentication, email security, licensing, and cloud identity services.
- Maintain secure cloud infrastructure following Microsoft best practices.

Acrisure — Account Coordinator (2024–Present)

- Support insurance professionals using **Applied Epic and AMS360** to resolve workflow and policy administration issues.
- Communicate with internal stakeholders to troubleshoot operational issues and ensure timely resolution.
- Maintain Indiana Property & Casualty licensing.

Technical Projects

FocalDesk — Linux Desktop Environment (Rust)

Creator & Lead Developer / January 2026–Present

- Architect and develop an open-source Linux desktop environment in Rust featuring a Wayland compositor, display manager, and system services.
- Designed modular, secure system architecture utilizing systemd, IPC, GPU acceleration, and multi-monitor rendering.
- Integrated AI, voice recognition, and workflow automation into a production-quality Linux desktop platform.
- Maintain public GitHub project with automated CI, static analysis, and modern engineering practices.

Education

University of the People
Bachelor of Science, Computer Science
Graduated: April 2026
GPA: 3.28
Honors List (3 consecutive terms)

Skills

Microsoft 365 • Microsoft Entra ID (Azure AD) • Exchange Online • Active Directory • Windows Server • VMware ESXi • ServiceNow • Cisco IOS/Catalyst • Meraki • Dell PowerConnect • HP ProCurve • TCP/IP • DNS • DHCP • VPN • PowerShell • Linux • Python • Rust • C/C++ • C# • SQL • WSUS • Microsoft Intune • SharePoint Online

Certifications

CSM, CSPO, CCSK, CCZT, IBM AI Engineering, IBM Data Science
