PROFESSIONAL SUMMARY

Systems Software Engineer with 25+ years of experience designing Linux infrastructure, enterprise automation, networking, and high-performance software. Creator of FocalDesk, a Rust-based Wayland desktop environment, and FocalVector, a Rust vector database. Experienced in Rust, systems programming, concurrent software design, Wayland, DRM/KMS, IPC, Linux graphics, and performance optimization.

CORE COMPETENCIES

Development: Rust • Tokio • async/await • synchronization • lock-free/concurrent programming • IPC • systemd • Wayland • DRM/KMS • PipeWire • XWayland • OpenGL ES • GPU rendering

Systems Programming: Rust, Linux, Async Programming, Concurrency, Synchronization, IPC, Wayland, DRM/KMS, Performance Optimization, Benchmarking

Infrastructure: Linux, Windows Server, VMware, Virtual Iron, Active Directory, Microsoft 365, Networking, Virtualization, Storage, Enterprise PKI (Microsoft AD CS), X.509, TLS/SSL

Enterprise Applications: ServiceNow, Enterprise Application Support

Business Analysis: Application Administration, Systems Integration, Workflow Automation, Requirements Gathering, Process Improvement

PROFESSIONAL EXPERIENCE

United Insurance Agencies / Acrisure — Systems Administrator (1998–2023)

Automation & Application Development

- Designed a multi-threaded renewal tracking system that automated data imports, grouped policies by expiration, and generated SharePoint reminders; reduced processing time by over 90% (3 hours to 15 minutes)
- Developed a web-based quote generation system using dynamic workflows, automated policy language insertion, and PDF generation; reduced preparation time by over 90%

Infrastructure & Operations

- Led planning and execution of enterprise data center relocation with a 2-day recovery requirement; restored operations in 12 hours
- Designed and implemented remote access solutions enabling full business continuity during COVID-19
- Led virtualization and infrastructure modernization initiatives, including migration from VirtualIron to VMware, server consolidation, and platform upgrades.
- Designed and implemented enterprise monitoring using OpenNMS with custom dashboards, alerts, and automation.
- Administered Active Directory, creating and maintaining Group Policy Objects (GPOs), managing user access, and supporting enterprise Windows infrastructure.

Systems Integration & Optimization

- Integrated AMS360 with telephony systems to enable automatic customer record retrieval
- Implemented monitoring, reporting, and automation solutions improving operational reliability

- Supported enterprise infrastructure including networking, security, virtualization, and business applications
- Administered AMS360, providing application support, user administration, troubleshooting, and system maintenance.

Acrisure — Service Desk Specialist (2023–2024)

- Delivered technical support and incident resolution for enterprise users
- Managed and resolved service requests using ServiceNow
- Supported business applications, access management, and system issues

Acrisure — Account Coordinator (2024–Present)

- Support insurance operations using Applied Epic and AMS360.
 - Participated in the organization's AMS360 to Applied Epic migration.
 - Maintain an active Indiana Property & Casualty License.
-

Open Source Software Engineering

FocalDesk — Wayland Desktop Environment (Rust)

Designed and developed **FocalDesk**, a Wayland desktop environment in Rust implementing **DRM/KMS display management, GPU-accelerated rendering, XWayland compatibility, PipeWire integration, multi-monitor support, asynchronous IPC services, and local AI integration.**

- Architected concurrent desktop services using asynchronous Rust and event-driven IPC.
- Developed custom GLSL shaders for GPU-accelerated UI rendering, including polished glass materials and **etched-glass rendering of SVG outline icons.**
- Built a modular desktop platform consisting of a compositor, display manager, desktop services, credential management, and AI components.
- 200+ source files

- Implemented native multi-monitor rendering and display management using DRM/KMS.
- Daily-drive FocalDesk as my primary Linux desktop for software development and general productivity.

FocalVector — Vector Database (Rust)

Designed and implemented a Rust vector database supporting approximate nearest-neighbor indexing, persistent storage, and benchmark suites measuring indexing throughput, query latency, recall, and scalability across varying dataset sizes.

EDUCATION

Bachelor of Science in Computer Science — University of the People (2026)

CERTIFICATIONS

Agile & Product: Certified Scrum Product Owner (CSPO), Certified ScrumMaster (CSM), ICAgile Certified Professional (ICP)

Security & Cloud: Certificate of Cloud Security Knowledge (CCSK), Certificate of Competence in Zero Trust (CCZT)

AI & Data: IBM AI Engineering Professional Certificate, IBM Data Science Professional Certificate, TensorFlow Developer Certificate

Licensing: Indiana Property & Casualty License
